

## Workday Student

Higher education is experiencing change like never before. Shifts in student demographics and enrollment behaviors, decreased funding, and soaring enrollment costs make it difficult for colleges and universities to help students achieve success. Decades-old, rigid administrative processes and technologies add even more challenges.

Workday teamed up with higher education's top institutions to create Workday Student—the only student administration application built in this century and designed for today's mobile generation. Together, we have developed a superior alternative for colleges and universities still using outdated legacy technology to run their campuses.

This end-to-end student lifecycle information system is designed to work seamlessly with Workday Financial Management, Workday Human Capital Management, Workday Adaptive Planning, and Workday Grants Management. Unite your entire campus under a single configurable, easy-to-use application that is delivered in the cloud.

Workday Enterprise Management Cloud for Higher Education

### A Vision for Student Success

Designed to enable institutions to transform themselves to meet the changing needs of their mission of teaching, learning, and research, Workday Student offers flexibility, delivers new insights, and provides a simplified student experience to institutions facing change. With Workday's flexible foundation, when your institution faces change, Workday can change with you through configuration capabilities and continuous delivery model. Workday also understands that active student engagement is paramount throughout a student's journey. Workday built native engagement tools into the entire product suite, enabling you to actively engage students in the moments that matter. The goal is to enable campus communities to focus on what matters most: a student's success.

### Key Benefits

- Gain new insights with a unified data core across HCM, Financial Management, and Student
- Engage students throughout their journey and provide mobile experiences
- Enable students to plan courses and understand academic eligibility and progress
- Empower students, faculty, and staff through self-service and user-friendly interface
- Reduce costs with true cloud delivery model

### Key Features

- Single user experience throughout the student lifecycle
- Delivered end user reports and dashboards
- Self-service and mobile application capabilities
- Seamless academic planning to saved schedule to registration experience
- Flexible foundation provides agility to change requirements on the fly
- Mobile application places tasks and information into the hands of users

## Flexible Foundation

Workday Student was designed with a flexible architecture to provide the greatest level of personalization. This foundation provides you the tools that facilitate system alignment with the way you do things at your institution. Curriculum, calendaring, academic policies, grading schemes, billing, and more are supported with configuration options as well as delivered business processes.

## Focus on Experiences

Workday focuses on the experiences of the primary users: students, faculty, administrators, and third parties. Considering that each of these users have different motivators and expectations, Workday works closely with each type of user to determine how features should evolve. For example, if students want to give their parents the ability to see their schedule and pay for their classes, three experiences are involved (the students', the parents', and the administrators'). The goal is to provide end users seamless connections to accomplish their tasks, combined with a simplified experience to ensure their success.

## Active Student Engagement

An integral part of a modern student system is native engagement tools that can actively engage students throughout their educational journey. These engagements are not static; they can be proactive based on actions taken, connections made, and barriers removed—enhancing efficiency and supporting self-service for students. Active engagement includes notifications, third-party access, action items, academic progress, alerts, appointment scheduling, override requests, and more. And the information gained from these engagement moments gives you the data you need in order to inform next actions.

## Discover New Insights

With Workday, native reporting and a unified data core facilitates putting the power of data into the hands of end users. For example, Workday's academic planner tracks what courses students have planned to complete in current or future semesters, providing the university registrar and provost insights into actual course demand, which enables them to better allocate course resources. Workday's unified data core is able to combine Workday HCM, Financial Management, Payroll, and Student data elements, creating quick insights into work/-study eligibility, payroll calculations, and providing insight into remaining work-study funds available.

## One System with Workday

Workday unifies Financial Management, HCM, Planning, and Student applications in a single platform. As a result, your institution can rely on a real-time, single source of truth. When Workday Student is combined with Workday Financial Management, new insights, such as revenue by program of study, are instantaneous.

Workday Student is a student lifecycle application embedded with powerful engagement tools that inform and guide students in the moments that matter.

## WORKDAY STUDENT

### Admissions

### Advising
